1. DEFROST TRAY.
2. SILICONE RIM.

WARNINGS & PRECAUTIONS

Do **NOT** refrigerate.

Do **NOT** place the Defrost Tray in ovens, microwaves or on hobs.

Wash hands and surfaces thoroughly with warm soapy water before and after handling meat and other fresh foods.

Keep fresh meat and meat juices away from other foods during thawing and preparation.

Never place cooked foods on the Defrost Tray with food that is thawing.

USAGE

- The VonShef Defrost Tray is extremely easy to use, harnessing the naturally conductive properties of aluminium to absorb ambient heat, and using this heat to speed up the defrosting process of foods placed on top of it.
- All you need to do is to place the food evenly on top of the **TRAY** (removing packaging beforehand).
- The **SILICONE RIM** helps prevent any defrosted juices from dripping off the **TRAY**.

NOTE: Defrost time will vary depending on thickness of the food.

TIP: Turning the food may help speed up the thawing process.

NOTE: This Defrost Tray can be used to speed up the defrosting of items in containers, however please be aware that this will take longer.

CAUTION: Do not use metal utensils (knives, spatulas etc.) on the Defrost Tray as this may damage the surface, affecting the performance.

 **WARNING!** As always, take precautions when handling raw food.

CLEANING & MAINTENANCE

- Remove the **SILICONE RIM** from around the **TRAY** and leave both to soak in warm soapy water. Scrub clean using a soft cloth or sponge.
- Make sure the **TRAY** and **SILICONE RIM** are thoroughly dry before putting back together.
CAUTION: Do not use abrasive cleaning products which may cause damage to the surface of the Defrost Tray.
